DETAILED ACTION

Response to Amendment

1. Applicant's amendment filed on 6/13/07 has been entered.

Claims 1- 15, are pending in the application.

In response to applicant's submission of Replacement Drawings filed on 6/13/07 the objections are withdrawn.

Response to Arguments

2. Applicant's arguments filed on 6/13/07 have been fully considered and are persuasive (see page 6 - 13, of the remarks filed on 6/13/07). The rejection under 103(a) has been withdrawn and claims 1 - 15 are now allowed.

Information Disclosure Statement

3. The information disclosure statement (IDS) submitted on 9/21/04, the information disclosure statement is being considered by the examiner.

Reason For Allowance

4. The following is an examiner's statement of reasons for allowance:

Claims 1 – 15, are allowed.

Applicant's arguments (see page 6 – 13, of the remarks filed on 6/13/07). The prior art of record Lin et al., (US.6,763,127) disclose a method for recognizing fingerprints. Lin constructs a directional map of 8x8 bit blocks of an image. Each block has a location and direction. It should be noted that the Lin 'blocks of bits' that have locations and directions are not the features he uses for fingerprint matching. Features

only come later, after morphological filtering, thinning, and numerous other steps, Lin extracts ridge flows and minutia. At this point features have been extracted, see column 2, nowhere, does Lin describe that the 400 byte record includes a location and orientation of each extracted feature. The only thing that has location and direction are the 8x8 bit blocks. But it is quite clear from Lin that the blocks are not the weighted features as claimed. Lin does not measure difference of location and orientation of his features. Lin does not teach summing the weights of all features of the reference record that are less than a predetermined difference (between locations and orientations) when compared with the features of the test record to determine a similarity score that the test record matches the reference record , as commonly included in each of the independent claims 1 and 15, the prior art of record fails to teach either singularly or in combination, fails to anticipate or render the above limitations obvious.

5. Any comments considered necessary by applicant must be submitted on later than the payment of the issue fee and to avoid processing delays should preferably accompany the issue fee. Such submissions should be clearly labeled, comments on statement of reasons for allowance.
